We were a Douglas Democrat in 1850, and stand today where we did then. We cannot indorse the acts of Abraham Lincoln since he took his seat in the Presidential chair; doctrine of Secession, advocated by Jeff. Davis and his cohorts. We are for the whole Union; and we are in favor of not letting a single State depart from the Union, or a star being torn from the American flag, until the "last man and the last dollar" have been sacrificed in defence of the same.

Canon and Rain. Professor Henry, of the Smithsonian Institute, in speaking of the drought and of the rain which fell a week ago, says: "The idea has frequently been advanced that a drought may be interrupted by the firing of cannon, but a little reflection will convince us that this is a fallacy. The powder in the air is not sufficient to produce a rain. If, however, the air is recharged with moisture, and the temperature is in an unstable condition which immediately precedes rain, then a violent commotion or an upward current of air produced by a large fire may bring on a rain, which might, in some rare instances, not otherwise have fallen."

Dirty as a Diet. A physician in Connecticut has recently made a discovery which must prove of immense benefit in these times of exorbitant prices of living. This discovery is that dirt, the soil on which we tread with careless feet, can be converted into a wholesome article of diet. The Connecticut doctor is said to have been led to this important discovery by the reflection that the Patagonians and other athletic tribes make dirt a portion of their daily food.
